

Design

The aesthetics of the Avoca range reflect a growing appetite for clean, sophisticated and modern stylings in the bathroom.

All products have been designed with ease of use and functionality in mind – the expertly crafted lever handles are perfectly suited for all ages and abilities.

Installation & Maintenance

Simple to fit - easy fit valve connections and easy fit rail kit.

Reduced installation costs – fitting a bath shower mixer rather than an electric shower means there is no need for a Part P plumber or the installation of separate bath taps.

Easy to maintain – domed press top waste can be easily removed for cleaning.

Replacement parts – strong stock levels of spare parts and a customer care team on hand to support.

Support Part G - 110 litres per person per day

The Avoca range utilises the flow regulation technology for which we've long been recognised as a leader in.

Our roots in Australia and New Zealand, where water scarcity has been recognised as an issue for many years now, means we are serious about water savings and pass the benefits of this focus on to our customers.

The Avoca basin mixer and basin taps are optimised to operate at 4l/min, while we offer shower heads featuring our patented Satinjet or Satinjet Low Flow technology at 8l/min or 5.5l/min respectively.

We are proud to use less water without any compromise on performance.

Creating amazing water experiences is what we do every day at Methven and have done since 1886.

Today, we are world renowned for beautifully designed, award-winning showers, taps and valves.

Methven's Avoca range combines our history of creating amazing water experiences with a fresh, modern approach to deliver unparalleled performance, efficiency and design.

The range is tailor made for regular usage in environments where safety and water efficiency are paramount.

Cold Start

- Innovative cold start technology - the boiler remains disengaged until purposefully instructed to do so by the user to help save energy.
- Operates at an optimised flow rate of 4 litres per minute to minimise water consumption and to help save money on water bills.
- Easy to use - features a wide lever handle that allows for effortless operation, even with a closed fist.
- Supplied with a domed press top waste which can be easily removed for cleaning.

Safety

Regulation compliance is key to achieving the highest levels of safety and the Avoca range's thermostatic bath filler and shower options are fully TMV2 approved, making them ideal for domestic settings.

The cold start function on the Avoca basin mixer eliminates the worry of issues associated with unexpected temperatures, giving full confidence with every use.

Certified to NSF TMV2

WRAS APPROVED PRODUCT

Avoca Collection

COLD START BASIN MIXER AVBCP

- Fitted with directional aerator to prevent splashback
- Fitted with a 4 litre per minute flow regulator
- Includes easy clean mushroom waste
- Working pressure – 0.5 - 5.0 bar

Water Label 4 l/min

20 YEAR WARRANTY* PARTS & CONDITIONS APPLY

Tapware

BASIN TAPS AVBTCP

- Ceramic disc handles ensure a smooth operation and longer life
- Brass back nuts for secure installation
- Fitted with 4 litre per minute flow regulators
- Include pre-fitted flow straighteners
- Working pressure 0.3 - 5.0 bar

Water Label 4 l/min

5 YEAR WARRANTY* PARTS & CONDITIONS APPLY

Thermostatic

BATH FILLER AVBFCP

- Ceramic disc handles ensure a smooth operation and longer life
- Brass back nuts for secure installation
- Separate hot and cold supply
- Working pressure 0.1 - 5.0 bar

THERMOSTATIC BATH FILLER AVTBF

- Thermostatic control with 38°C temperature hot stop (with override)
- Supplied with brass back nuts for a secure fit
- Working pressure – 0.5 - 5.0 bar

THERMOSTATIC BATH SHOWER MIXER AVTBSMNK

- Thermostatic control with 38°C temperature hot stop (with override)
- Supplied with brass back nuts for a secure fit
- Working pressure – 0.5 - 5.0 bar

Satinjet® TECHNOLOGY

Our award-winning Satinjet technology produces 300,000 droplets per second and provides a full-body shower sensation.

Satinjet uses unique twin-jet technology to create optimum water droplet size and pressure, delivering a softer spray than a conventional shower ensuring that users young and old can enjoy an experience like no other.

CONVENTIONAL SHOWER SPRAY

SATINJET® SHOWER SPRAY

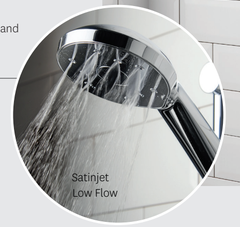
Satinjet® Showers

Available at 8 litres per minute or low flow at 5.5 litres per minute

COOL TOUCH BAR SHOWER WITH EASY FIT KIT AVCTS

- Patented Satinjet showering technology in the Kiri MK2 handset is optimised at 8 litres per minute
- Thermostatic control with 38°C temperature hot stop (with override)
- Valve is safe and cool to touch
- Includes easy fit valve connections and easy fit rail kit
- Supplied with smooth, easy clean hose, hose retainer and soap dish
- Working pressure – 0.3 – 5.0 bar

Water Label 8.0 l/min



5 YEAR WARRANTY* PARTS & CONDITIONS APPLY

Thermostatic

LOW FLOW COOL TOUCH BAR SHOWER WITH EASY FIT KIT AVCTSLF

- Patented Satinjet showering technology in the low flow Kiri MK2 handset is optimised at 5.5 litres per minute
- Working pressure – 1.0 - 5.0 bar

Water Label 5.5 l/min

THERMOSTATIC BATH SHOWER MIXER AVTBSMEF

- Patented Satinjet showering technology in the Kiri MK2 handset is optimised at 8 litres per minute
- Thermostatic control with 38°C temperature hot stop (with override)
- Supplied with brass back nuts for a secure fit
- Working pressure – 0.5 - 5.0 bar

Water Label 8.0 l/min

LOW FLOW THERMOSTATIC BATH SHOWER MIXER AVTBSMEFLF

- Patented Satinjet showering technology in the low flow Kiri MK2 handset is optimised at 5.5 litres per minute
- Working pressure – 1.0 - 5.0 bar

Water Label 5.5 l/min

CATEGORY 5 HOSE RETAINER WALL MOUNTED SPE20

- Secure connection, requires destruction to remove hose once fitted
- Restricts handset movement to maintain air gap and prevent back siphonage, ensuring compliance with UK water regulations
