

Design

The aesthetics of the Avoca range reflect a growing appetite for clean, sophisticated and modern stylings in the bathroom.

All products have been designed with ease of use and functionality in mind – the expertly crafted lever handles are perfectly suited for all ages and abilities.

Creating amazing water experiences is what we do every day at Methven and have done since 1886.

Today, we are world renowned for beautifully designed, award-winning showers, taps and valves.

Methven's Avoca range combines our history of creating amazing water experiences with a fresh, modern approach to deliver unparalleled performance, efficiency and design.

The range is tailor made for regular usage in environments where safety and water efficiency are paramount.

The new
Avoca
collection

Inclusively designed with ease of use and functionality in mind, the Avoca collection also includes innovative showering technology to use less water.

www.uk.methven.com

Installation & Maintenance

Simple to fit - easy fit valve connections and easy fit rail kit

Reduced installation costs – fitting a bath shower mixer rather than an electric shower means there is no need for a Part P plumber or the installation of separate bath taps

Easy to maintain – domed press top waste can be easily removed for cleaning

Replacement parts – strong stock levels of spare parts and a customer care team on hand to support

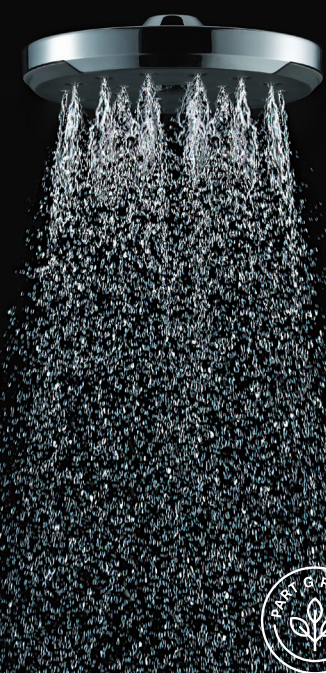

Support future Part G (2025) 110 litres per person per day

The Avoca range utilises the flow regulation technology for which we've long been recognised as a leader in.

Our roots in Australia and New Zealand, where water scarcity has been recognised as an issue for many years now, means we are serious about water savings and pass the benefits of this focus on to our customers.

The Avoca basin mixer is optimised to operate at 4l/min, while we offer shower heads featuring our patented Satinjet or Satinjet Low Flow technology at 8l/min or 5.5l/min respectively.

We are proud to use less water without any compromise on performance.

Avoca Collection

COLD START BASIN MIXER AVBCP

- Fitted with directional aerator to prevent splashback
- Fitted with a 4 litre per minute flow regulator
- Includes easy clean mushroom waste
- Working pressure – 0.5 - 5.0 bar

£300.45 EX VAT/£360.54 INC VAT

Satinjet Low Flow

Cold Start

- Innovative cold start technology - the boiler remains disengaged until purposefully instructed to do so by the user to help save energy
- Operates at an optimised flow rate of 4 litres per minute to minimise water consumption and to help save money on water bills
- Easy to use - features a wide lever handle that allows for effortless operation, even with a closed fist
- Supplied with a domed press top waste which can be easily removed for cleaning

Safety

Regulation compliance is key to achieving the highest levels of safety and the Avoca range's thermostatic bath filler and shower options are fully TMV2 approved, making them ideal for domestic settings.

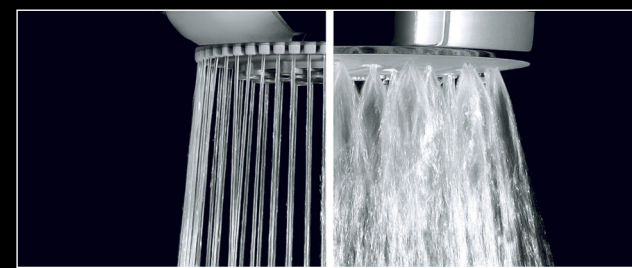

The cold start function on the Avoca basin mixer eliminates the worry of issues associated with unexpected temperatures, giving full confidence with every use.

Satinjet® TECHNOLOGY

Our award-winning Satinjet technology produces 300,000 droplets per second and provides a full-body shower sensation.

Satinjet uses unique twin-jet technology to create optimum water droplet size and pressure, delivering a softer spray than a conventional shower ensuring that users young and old can enjoy an experience like no other.

CONVENTIONAL SHOWER SPRAY

SATINJET® SHOWER SPRAY
